

# ASBP Embodied Carbon/LCA Webinar Series

## Tool Information Sheet

Tool name	eToolLCD
Website	<a href="https://etoolglobal.com/">https://etoolglobal.com/</a>
Cost for users?	Dependant on subscription level – Between \$50 USD and \$500 USD per month
Where does it source its data for materials?	Default eTool Datasets(Ecoinvent), IMPACT, EPDs
Which life cycle modules does it include? (delete as applicable)	A1-A3 A4 A5 B1 B2 B3 B4 B5 B6 B7 C1 C2 C3 C4 Module D
Which environmental indicators does it include? (delete as applicable)	EN15804+A2 with additional indicators such as Material Efficiency Metrics (circularity)
Where is scenario data sourced from? (if relevant)	
Transport:	Default values as per industry average. Can also be modelled by the user.
Site waste:	Default values as per industry average. Can also be modelled by the user.
Services lives:	Default values as per industry average. Can also be modelled by the user.
End of life routes:	Default values as per industry average. Can also be modelled by the user.
Does it link with CAD/BIM tools, if so which?	Revit, MS Excel
Can you export results, e.g. to Excel or Word?	Yes. Exports results in Excel as well as automated reports in Word and PDF.
Additional features (e.g. whole life costing)	Life Cycle Costing is included in the license
What help is available to users?	Online Training, Tutorials, Email
Is there a checking or auditing service to review assessments?	Third Party Verification by a member of the eTool team is included.
